### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6-13-2006 has been entered.

2. Claims 11-30 are pending in this application and have been examined.

### ***Response to Arguments***

3. Applicant's arguments filed 6-23-2004 have been fully considered, and when taken together with the changes made to the claim language by the latest amendment, are persuasive in overcoming the rejections of the claims under 35 USC 102(b) and 103(a) as presented in the previous Office Action.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2137

5. Claims 19 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims each recite the limitation: "wherein the block cipher includes a data encryption standard." It's unclear from the context of the term "data encryption standard" whether the applicant contemplates that the block cipher is based solely on the official Data Encryption Standard (DES), or whether any encryption standard is encompassed by the term. One of ordinary skill in the art would not be appraised of the scope of the claim as it is currently written.

***Allowable Subject Matter***

6. Claims 11-18, 20-23, and 25-30 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art in the field, Atalla, does not teach the combination of features found in the independent claims, particularly including the steps of calculating authentication tokens for signals as a function of data in a subsequent communications phase, and calculation of a corresponding authentication token at a receiver prior to transmission of the data.

Art Unit: 2137

8. Claims 19 and 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***
